

Heaps Class - 2

Special class

Heap → (BT + Heap Property)

①

priority-queue

\rightarrow i/p \rightarrow $[] \rightarrow \{ 3, 7, 4, 5, 8, 6, 9 \}$ $K = 4$

give me K^{th} smallest element

$\{ \cancel{3}, \cancel{4}, \cancel{5}, \cancel{6}, 7, 8, 9 \}$

4^{th} smallest element

h-size heap & pop

#1 \rightarrow $n \log n$

#2 \rightarrow min-heap $O(n)$

$\{ \cancel{3}, \cancel{4}, \cancel{5}, \cancel{6}, 7, 8, 9 \} \rightarrow \text{ans}[K-1]$

pop pop pop print

$I^{\text{st}} \quad II \quad III \quad IV$

$O(K-1)$

$\{ 3, 4, 5, 6, 7, 8, 9 \}$

#3 \rightarrow Max-heap(K size) \rightarrow $O(K)$

first K element \rightarrow Max-heap

remaining element \rightarrow $44 < pq.top()$

print

max-heap with K small element heap

①

max-heap \rightarrow k size

\hookrightarrow first k elements

$(k=4)$

k smaller elements

starting k 4
small elements

(I)

first class to process know

$\{ \overline{5}, 7, 8, 12, 2, \overline{9} \}$
 $k=3$

2 5 7 8 5 12
↑

3rd small

1st small

$12 < 8$ ✗

$2 < 8 =$

$9 < 7$ ✗

starty 14 · 3 small down L₁

$$-n^2$$

$$(2)^L$$

$$4$$

$$n^3$$

$$2^3$$

$$8$$

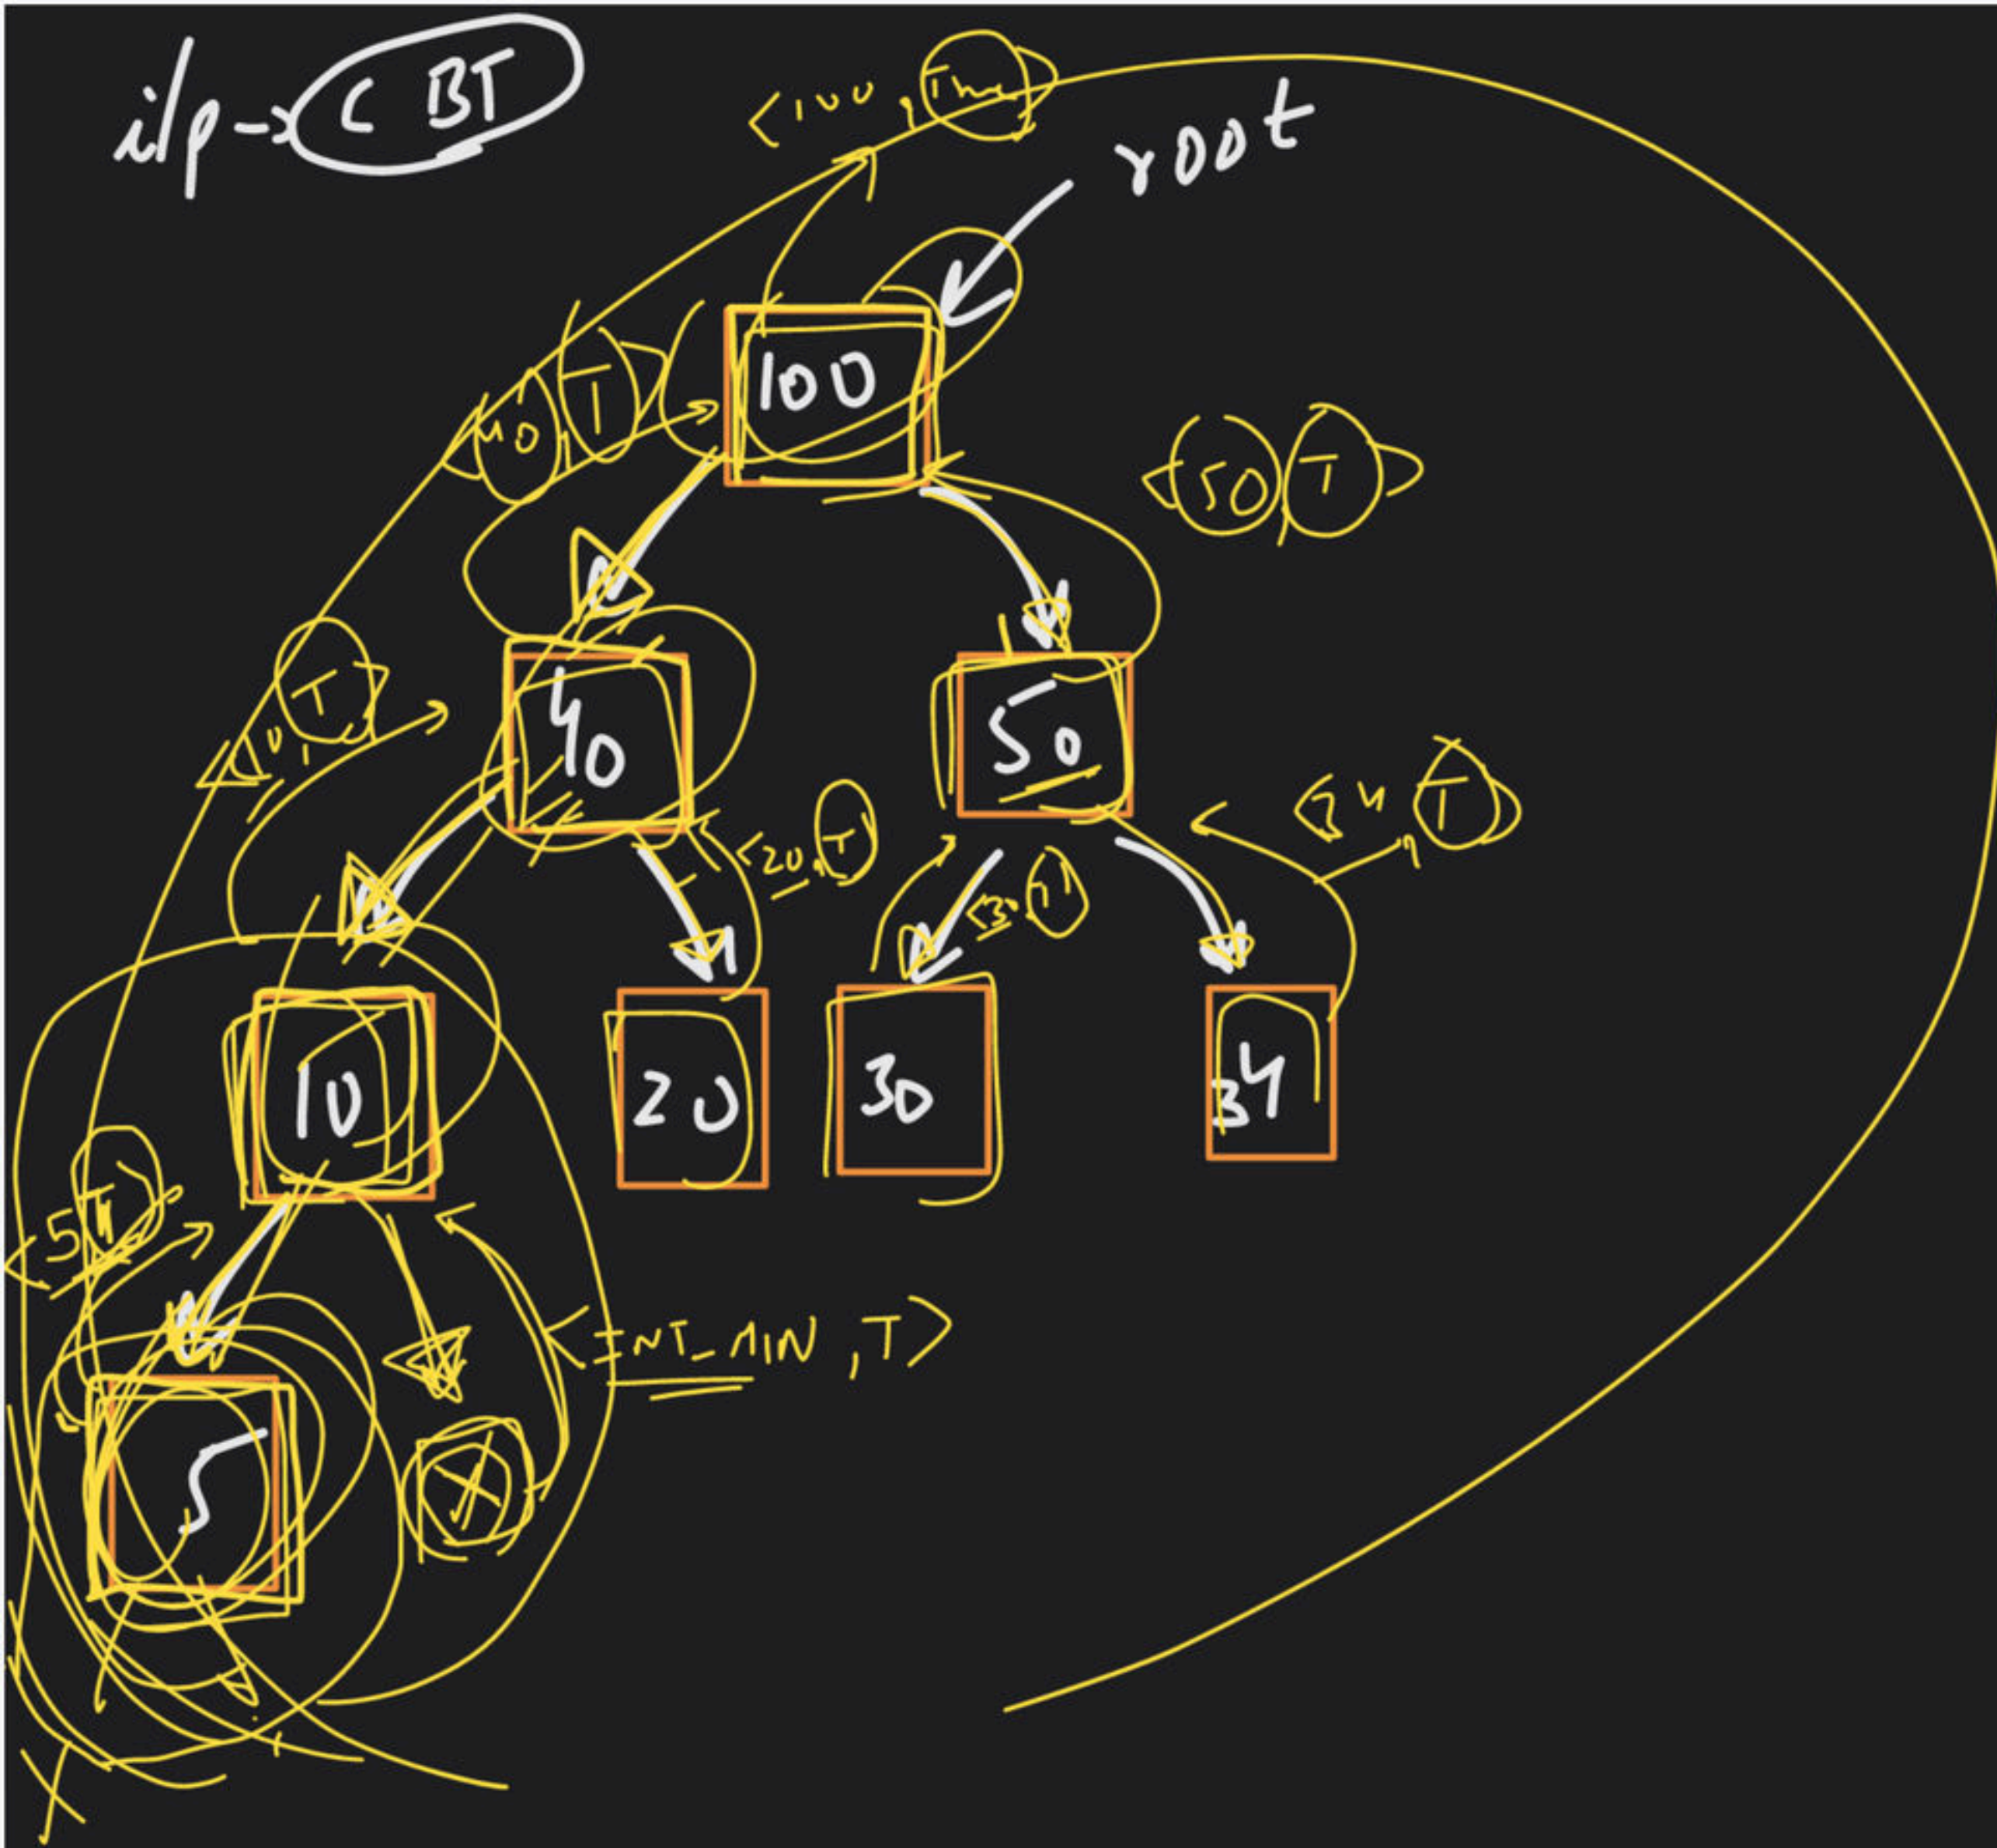

→ BT → is Valid ^{Max} (Heap) or not

Heap → ~~BT~~ + {Heap prop}

$P > L_1$
 $P > L_2$

ilp -> C BT

$\langle x, y \rangle$
 max value
 of subtree
 T/F
 subtree is
 valid
 Max-heap
 or not

→ left subtree → True → Heap
 → right subtree → True → Heap
 → 10 > 5 → True
 → 10 > INT_MIN → True

Valid Heap

whether a CBT or not

Last Node \rightarrow 13

Total Node = 9

Last node > total node

Not a CBT

Post → LRN
